

## R&D

We have a highly qualified and extensive team of mechanical and electronic engineers with many years of experience in the sector, to continue in developing and innovating with the most efficient programs.

## Machining Area

As manufacturers, our priority is to continue at the forefront with the most advanced machines in the machining sector. The productivity of our machines is in line with our demand. We reserve a margin to cover any increase of work demands.

## Electronic Area

The new production line for electronic devices counts on modern installations that meet the ESD requirements, as well as our qualified staff who work according to the IPC standards.

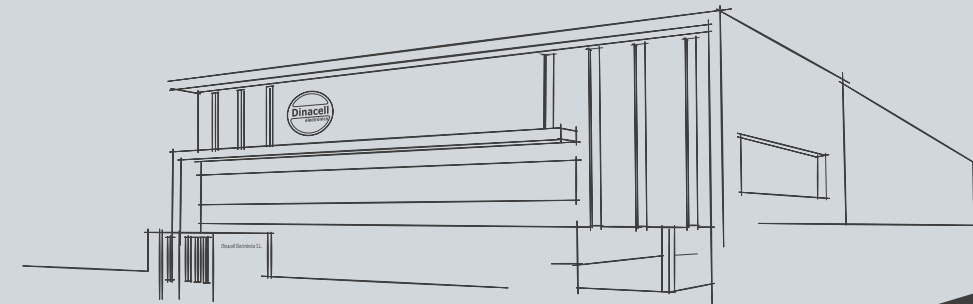

## Assembly Area

Being all the development in technology and research, Dinacell is composed of an extensive human team.

This allows a higher quality control in every step of the production process.

# Philosophy

## Our Mission

Our mission is to provide the best innovative products and service to our customers.

We do it with passion, creativeness, commitment, total responsibility and years of experience. We have strict quality and safety controls to make sure that you are getting the best!
